

**FOR IMMEDIATE RELEASE**

## **FIND A FRIEND, A LOVE, A FUN TIME IN 3DCHAT – THE NEW VIRTUAL WORLD OPENS ITS DOORS TODAY**

*Virtual World Geared to a Mature Audience is First to Verify Identities; Will Include Virtual and Real World Goods for Purchase and Gifting*

**Mount Pleasant, South Carolina – July 7, 2010** – 3Dchat LLC, in partnership with international veteran developer GolemLabs outside Montreal, Canada, announced today the full beta launch of its immersive 3D virtual world, **3Dchat**. Starting today, **3Dchat** players will be able to jump right into the social scene from the comfort of their own homes in a vast virtual world game with a customized social networking environment.

"3Dchat is for adults who are looking to meet and interact with other adults – whether it is for meeting new friends or old, finding that perfect date or creating an amazingly lifelike character and penthouse. It's for anyone looking for a good time," said Jene-René Couture, president of GolemLabs.

**3Dchat** also offers users a proprietary verification service that ensures the people in the **3Dchat** virtual world are verified adults, a first for virtual worlds.

"We qualify our members *before* they have access, so when you're talking to 'GinaSmiles' who claims to be a 29 year-old female from the Midwest, our verification service ensures you she is *actually* a girl, and she is over 18, without ever divulging any of her personal information," said Glen Garritano, CEO of 3Dchat LLC. "3Dchat is unlike anything else on the market right now, and we can't wait for people to try it out."

Head over to [www.3dchat.com](http://www.3dchat.com) now to download the game client, create a personalized avatar and start exploring the world.

From having a drink at the local pub, to dancing it up with a bevy of hot singles to simply meeting and conversing with like-minded adults, there is something for everyone. In addition, **3Dchat** will soon launch the first real-world/virtual world purchasing system allowing players to buy both virtual and real world goods from in-game to keep for themselves or gift to another user – so if you love the clothing another avatar is wearing, you can right click and purchase the real thing!

### **3Dchat Features Include:**

Identify Verification – **3Dchat**'s advanced proprietary authentication service takes users through a simple, quick and easy process that certifies users are over 18 through our official partner Arisotle, a world leader in identity verification. Once VERYfied, your profile will display a VERYfied badge, not only letting other users know that you're a legitimate user, but also opens up exclusive game content.

A Vast Virtual World – Starting from your Penthouse - which serves as the player's home base and is customizable and upgradeable with art, furniture and more - gamers can walk around a huge virtual world and check out places as diverse as dance clubs, bars, movie theaters, beaches and more.

Complete Character Customization – Most virtual world games like **3Dchat** feature avatars that are very blocky and antiquated; walking around and mingling with even as few as 10 characters and they all look very much alike. **3Dchat** features a refined and sophisticated character creation method that allows players to fine-tune their avatars to a level previously not seen in a virtual world. Make your character look similar to your real-life appearance, or go nuts and make a wild and crazy guy or gal!

Realistic Visuals – Built from the ground up using proven middleware and Emergent's award-winning Gamebryo engine, the look and feel of **3Dchat** is unlike any other virtual world on the market. Highly realistic textures across a wide variety of locales, sophisticated character models reminiscent of AAA titles, fluid avatar animations, dynamic lighting – it's all here in **3Dchat**.

**3Dchat** is a comprehensive virtual world geared toward a mature audience that has something for everyone, offering more varied gameplay options and interactions than any other virtual world currently on the market.
