

Pangea Software Releases Enigmo 3.0 Update with In-App Level Purchases for iPhone™ OS 3.0

AUSTIN, TX - June 17, 2009 – Pangea Software, is proud to announce that ***Enigmo 3.0***, a free update for their award-winning physics based puzzle game, is available now for the Apple® iPhone™ and iPod® touch.

Enigmo 3.0 has been updated to take advantage of the new in-app purchasing capabilities of the iPhone OS 3.0. When users run Enigmo 3.0 on iPhone OS 3.0 they have the ability to purchase additional Level Packs which are created by Pangea Software. There are currently two new Level Packs available: Kid's Pack #1 and Kid's Pack #2. The new levels in each of these Level Packs have been designed specifically for kids.

"I get a lot of emails from people who say that their kids love to play Enigmo, but some of the levels are too difficult for the younger ones," said Brian Greenstone, president of Pangea Software. "So, for our first Level Packs we designed 50 new levels which are much easier than the ones that come with Enigmo, but they still present a challenge – perfect for kids!"

Level Packs are available for \$.99, and Pangea Software will be releasing more downloadable content in the near future.

Enigmo is the ultimate 3D puzzle game for the iPhone and iPod touch! To complete each level the player will need to manipulate various streams of flowing liquid so that the droplets can reach their destination. Liquids (water, oil, and lava) fall from droppers, and will bounce off walls in a visually stunning cascade. By moving various types of bumpers, sliders, accelerators, and sponges, the player diverts the flow of the falling droplets. The faster players complete each level the more bonus points they receive.
