## **O-Games Releases New *John Daly's ProStroke Golf* Screens to Celebrate his Fantastic Opening Rounds at St. Andrews!**

*"The Lion" shoots an electrifying opening round 66 to put him among the early leaders of the pack*

**July 16, 2010** – John Daly showed the world he can still "Grip it and Rip it" with the best golfers in the world, as the beloved everyman golfer shot a 6-under 66 in his opening round at the 150th Open Championship at the historic Royal and Ancient Golf Club of St. Andrews in Scotland. Stiff winds in excess of 30 miles per hour have severely affected Daly and the rest of the field's play in today's second round, but John is still very much in the hunt at -2, within striking distance of the lead.

To commemorate John's amazing first round (which matched the best round of his Open Championship career) at the birthplace of golf, O-Games has released a few new screenshots from the upcoming videogame, ***John Daly's ProStroke Golf***, launching on PlayStation®3 computer entertainment system, Xbox 360® video game and entertainment system from Microsoft, and PC later this fall. ***John Daly's ProStroke Golf*** is among the first videogames to be built from the ground up with PlayStation Move in mind, the new motion control system from Sony for use with the PlayStation 3. Utilizing the PlayStation Move controller, ***John Daly's ProStroke Golf*** allows for a truly unprecedented amount of control, allowing gamers to shape their shots with fades or draws with a simple turn of the wrist.
